EDUCATION

Bachelor of Science | Information Communication & Technology | Expected Graduation: Summer 2026
Florida State University | Tallahassee, FL

Certificate in Health Informatics | Florida State University | Expected: Summer 2026

Relevant Coursework: Intro to Health Informatics (LIS 4785), Advanced Health Informatics (LIS 4776),
Networking Essentials, IT Support & Troubleshooting, Web App Development

TECHNICAL SKILLS

Programming Languages: Java, HTML, CSS

Platforms/Tools: MySQL, Windows, macOS, Linux, Command-line/Terminal

IT Concepts: Networking, Risk Assessment, Database Management, Web Development

Health IT: HIPAA Compliance, EHR Systems, FHIR Standards, Clinical Informatics, Patient-Centered Design

HEALTH IT & SPECIAL PROJECTS

SkinSync | *Patient Health Tracking Application* | Course: *Health IT Design* | Spring 2025

- Designed a mobile health application for chronic condition tracking using patient-reported outcomes and clinical terminology.
- Applied UX research, user personas, and wireframing to build an Apple-inspired patient interface focused on accessibility.
- Translated clinical data into actionable, patient-friendly health insights to support non-technical users.

Website Redesign Project | Course: *Information Architecture Design* | Summer 2024

- Redesigned a teacher's portal to enhance usability, efficiency, and collaboration.
- Conducted user research, created personas, task flows, and wireframes for key pages.
- Delivered a comprehensive presentation detailing design decisions and usability improvements.

Self-Hosted Book Library | Course: *Information Technologies* | Fall 2024

- Built a self-hosted library for users to view and upload books securely.
- Utilized networking tools and basic security principles to ensure privacy and accessibility.
- Designed a user-friendly interface focusing on seamless navigation.

Car Sales Database Project | Course: *Information Systems and Services* | Fall 2024

- Designed and implemented a database system using command-line tools to manage and automate information reporting.
- Developed shell scripts for database backups and report generation to ensure data integrity.
- Practiced disaster recovery and system testing techniques to enhance service continuity.

IT Risk Assessment | Course: *Information Systems and Services* | Fall 2024

- Conducted a risk assessment to identify vulnerabilities in IT systems and potential threats.
- Proposed risk mitigation strategies using industry standard frameworks.
- Developed firsthand expertise in disaster recovery and business continuity planning.

WORK EXPERIENCE

Web Administrator Assistant Intern | Florida State University – Tallahassee, FL

September 2025 – Present

- Supported accessibility improvement efforts for university Drupal sites by organizing and analyzing SiteImprove exports and related site data.

- Built and refined structured spreadsheets to track site owners, contacts, and accessibility issues, improving clarity for Web Administration team.
- Cleaned, merged, and validated data from SiteImprove, Drupal inventories, and departmental lists to ensure accurate accessibility reporting.
- Mapped how Drupal site data, DNS records, and departmental directories could be aligned using URLs/subdomains to support creation of dynamic university website inventory.
- Delivered concise progress updates to supervisors, outlining completed tasks, active work, and upcoming priorities.

College of Information Helpdesk Technician | Florida State University – Tallahassee, FL

May 2023 – September 2025

- Provided technical support to over 100 staff and students, ensuring stable and secure system access in a high-demand academic environment.
- Performed remote and on-site troubleshooting with structured documentation of recurring issues for knowledge base improvement.
- Managed system updates, device provisioning, and account access to maintain consistent, secure IT operations.

FSU Think-AI Club Project Manager | Florida State University – Tallahassee, FL

January 2025 - Present

- Collaborate with peers on AI applications in health tech, automation, and real-world problem solving.
- Help organize workshops and hands-on projects to enhance AI knowledge and practical skills.
- Engage in discussions on AI ethics, machine learning, and emerging technologies.
